

## **Fireball Cinnamon Whisky**

**33%**

It does say "whisky" on the label...followed by "with natural cinnamon flavor." It's clear from the first sniff that this is a one-trick pony: hot, fiery cinnamon. But is there whisky flavor in there?

Fireball's as sweet as the liqueur proof would indicate, and as hot as advertised, and there's only a hint of whisky character under the fire. A novelty for tailgating; probably great in hot chocolate.

—Vol. 20, #4
