

Springbank Rundlets & Kilderkins

49.4%

Springbank has released a limited edition of 9,000 bottles of whisky distilled in November 2001, matured in small casks (traditionally known as rundlets or kilderkins), and bottled in January 2012. The small casks have left an impression of accelerated maturity, with coal smoke, cloves, young oak, and caramel on the rich nose. The palate is big and bold, with a sprinkling of salt, then more youthful wood, milk chocolate, and honey, while the finish is long and slightly tarry.
