

Old Hobart Overeem Sherry Cask Mated

43%

One of the challenges we face with new whisky is that it is evolving quickly, and while we understand that, it's hard to keep up. But the upside is we have shorter memories and that means life's easier for the likes of Old Hobart. A year ago this malt was two-dimensional, overly sweet, and definitely a work in progress. The change is remarkable. Now it's balanced, the sherry and sweetness are in order, and the sappiness has retreated. A\$130
