|   | Strength<br>51.4%   |   |
|   | Blended whiskies have taken a                                       |   |
|   | sexy turn for the better, and there                                 |   |
|   | have been some excellent  |   |
|   | attempts to innovate. Indeed, a                                     |   |
|   | gap has opened up between main                                      |   |
|   | label blends and this sort of thing,<br>which is particularly brave |   |
|   | because a world-class brand has                                     |   |
|   | let amateurs loose on it. That said,                                |   |
|   | this is massive, with big earthy                                    |   |
|   | spice, peat, and sour fruits.                                       |   |
|   | There's some youthful sappiness<br>in the mix, too, but it's not    |   |
|   | detrimental. Brave and impressive.                                  |   |
