

**Grant's Voyager**

**40%**

Molten blossom honey, almond milk puddings, and Parma violets interlaced with a fine, drifting chimney smoke compose the nose of this new blend from William Grant & Sons. Smooth, burnished orange and honey cough drops initially, then the flavor develops through more pronounced citrus and gentle spices to achieve a sweeter climax. The grain is quite evident in the harmony of the blend. The finish is long, more beeswax than honey, the sweetness finally depleted. *(Travel*
